TECHNICAL DEMANDS

Stage : 10m x 8m

SEE PLAN BELOW

Barbecue's space : The Organiser will provide a big barbecue (minimum size of a half metal barrel). The barbecue will be placed upstage. A security area is necessary all around it (marked out with trees, garlands, ...) as fire is lighted up by the artists **from the beginning of the performance** with a sweat mix of combustibile materials and it will burn until we've got perfect embers to make a barbecue.

Floor : The show requires a flat, smooth, hard and levelled floor (**photos of the space have to be sent to the technical contact for validation**). The show can not be performed on cobbles, gravels, grass....

Sound: The Organiser will provide 2 amplified speakers, 1 stage monitor, as well as all needed lines (sound and electric) to use this soundsystem. The show needs an electric input of 230 volts 16 amp upstage.

HAVE A LOOK AT the plan below to estimate the length of the lines.

The Troubouch brothers will have their own mix table with one Jack output for the stage monitor and 2 XLR inputs for the speakers.

Lighting: For evening performances, the organiser has to provide a total lighting of the stage.

Set up : *Self sufficient*, a minimum of 1 hour on the stage is required (exact timing to be defined according to the place) and 1 hour 30 minutes for technical preparation of all the props.

Strike : a minimum of 1 hour is required (exact timing to be defined according to the place).

Rehearsal – warming up : a minimum of 2 hours is required (exact timing to be defined according to the place)

Storage : In case of bad weather (rain, hail, hurricane, tsunami, attack of Godzilla, ...) : a storage place to protect the props will be needed.

SPECIAL DEMANDS

Sausages : At the end of the show the barbecue is ready to cook sausages that we share with the audience. We ask for 3 kilos of sausages per show provided by the Organiser (depending on the audience, halal sausages might be needed). We count on you to find a nice local butcher !

Wooden chairs : We ask for 6 wooden chairs per show, **SEE APPENDIX 1** for details. These chairs will be used during the show and will be burned into the barbecue. (**photos of those chairs have to be sent to the technical contact for validation**).

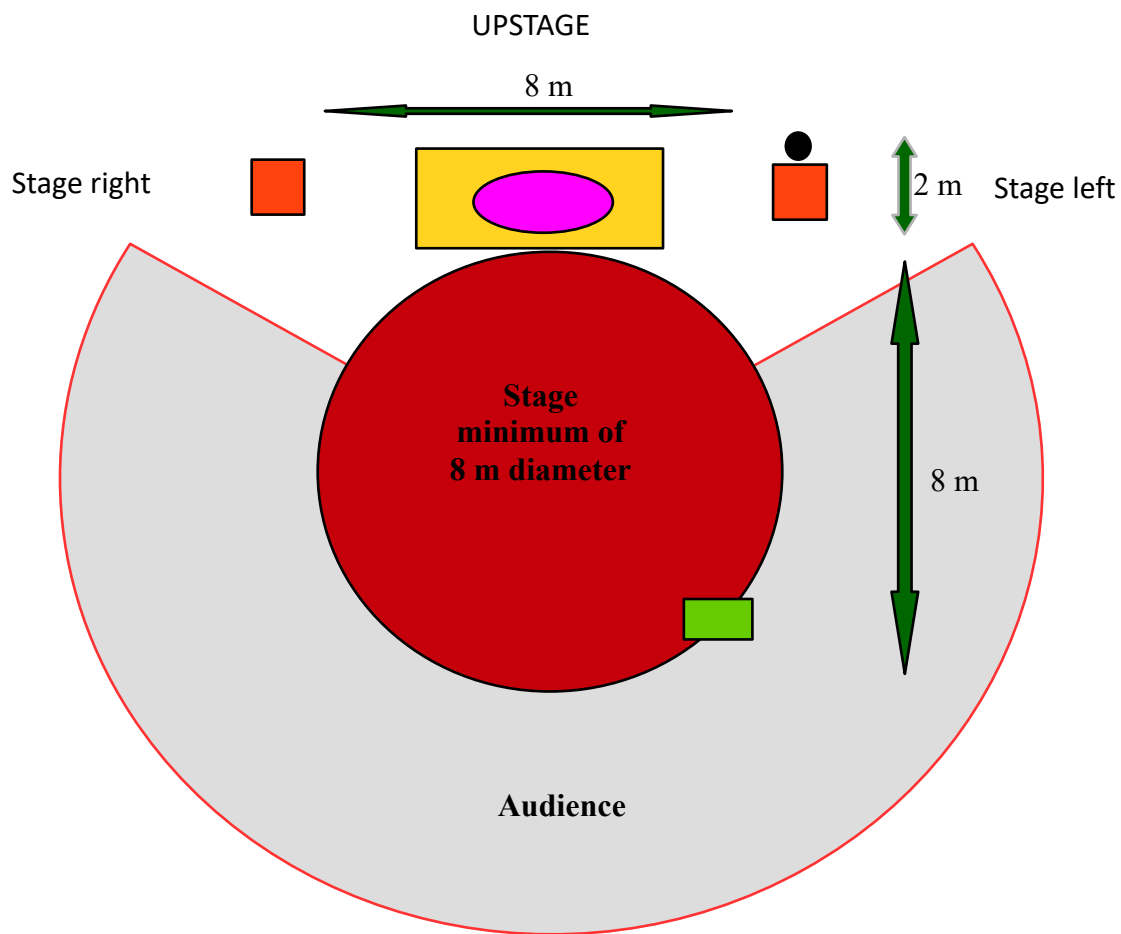

SMALL PROPS

Catapult : The organiser will provide a strong wooden board = length : 180cm x width : 20cm x thickness : 2,5cm **AND** a wooden log about 25 cm of diameter and 3 nails or screws and a hammer. The building and assembly of this extreme catapult will be done by the Troubouch Brothers, once arrived.

Small table : length 60 cm, width 60 cm, height 100 cm.

Metal bucket : around 20 cm of diameter and 50 cm of height, **IT HAS TO BE METAL** as it is used for fire.

PLAN

Speakers

1 Power supply of 230 volts 16 Amp

Sound control including 1 sampler,
1 microphone, 1 table et 1 foldback system.

Barbecue

Barbecue space secured

APPENDIX 1

PROVIDED BY THE ORGANISER: 6 wooden chairs

Those chairs will carefully be disassembled, weakened, then put back together before being burned.

- Exclusively wooden chairs. No fabric, no foam, no plastic, no leather...
- Can be dismantled
- Exclusively second-hand (donations, second-hand shops,...)
- They do not have to look the same
- They can be in poor shape, look used but need to stand

YES

Mulching able to be disassembled by hand or by removing some screws.

NO

Mulching not able to be disassembled by hand, impossible to put back together once dismantled.

Do not hesitate to contact us for any question:
